

# Form Inliner™ - 2" Bottom Outlet

The 2" Bottom Outlet on the Form Inliner™ fits through the opening at the base of the drum.

NITTEL Form Inliners™ are easily installed into an adapted 210 ltr. drum. The 2" bottom outlet on the liner fits through the opening at the base of the drum and once installed, a 2" outlet valve may easily be installed. Each Form Inliner fits the drum like a second skin without any folds or pockets. Form Inliners have a contoured lip that fold over the rim of the drum preventing leakage between the liner and the container wall.

#### Use:

Steel drums: 210 litres  
Steel pails: 20 - 120 litres

#### Versions:

Open  
Lids available

#### Material:

LDPE, also antistatic version  
PP, also antistatic version  
Food Grade

#### Application Examples:

NITTEL Form Inliners™ - Ideal for liquids and viscous liquids.

- Ideal for small batch storage, mixing, containment, decanting etc.
- No need to wash out drum, saving on costly cleaning chemicals and disposal of chemicals.
- 2" butterfly outlet valve or other fittings available.
- When using a liner there is no cross contamination when changing from product to product.
- We are able to supply the drums and fittings if required.
